

STEP-BY-STEP TUTORIAL FOR IMPORTING AKITA_AVAX INTO METAMASK

For this tutorial, Chrome browser is used with Metamask Extension.

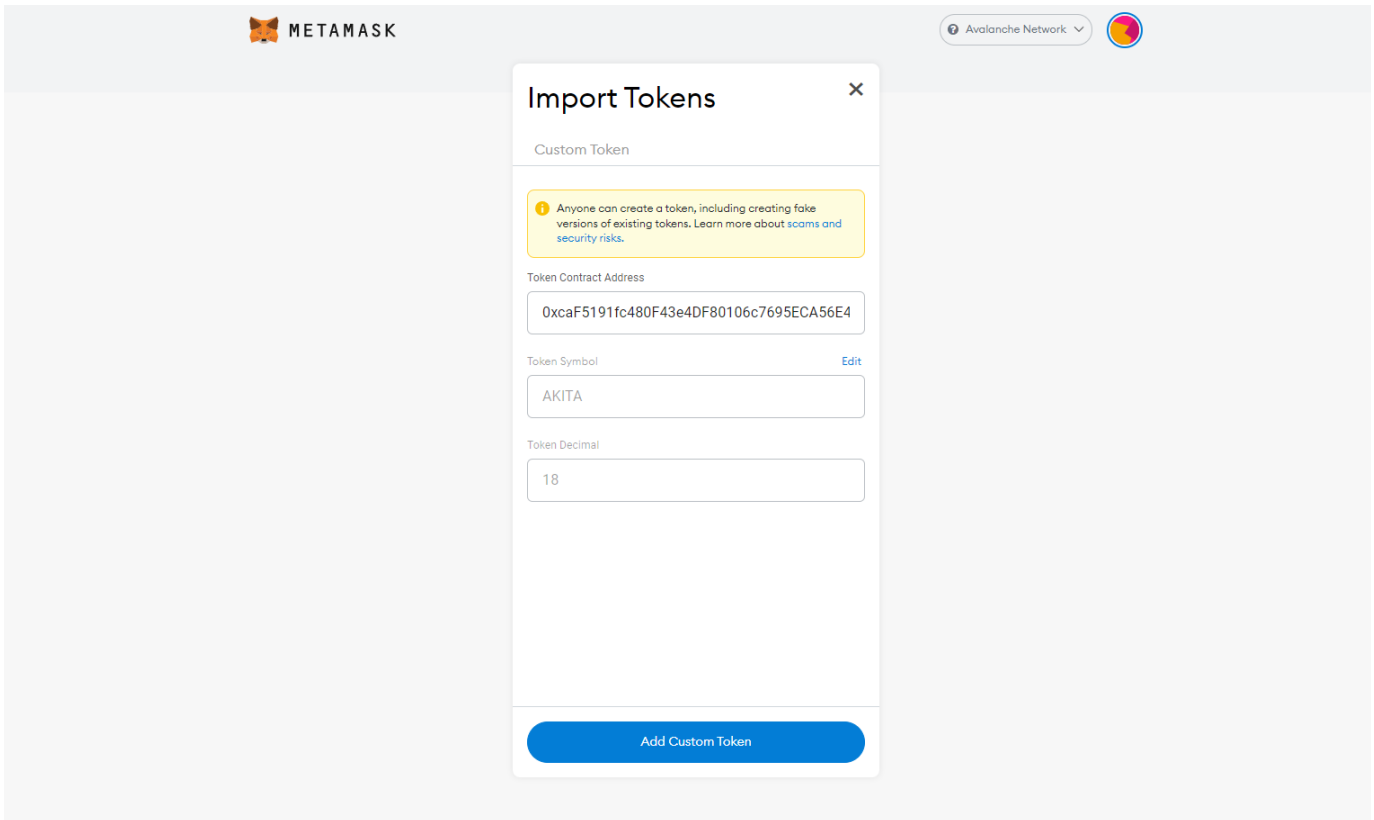

1. Go to your Metamask Extension (in expanded view) and ensure the network is set to Avalanche.

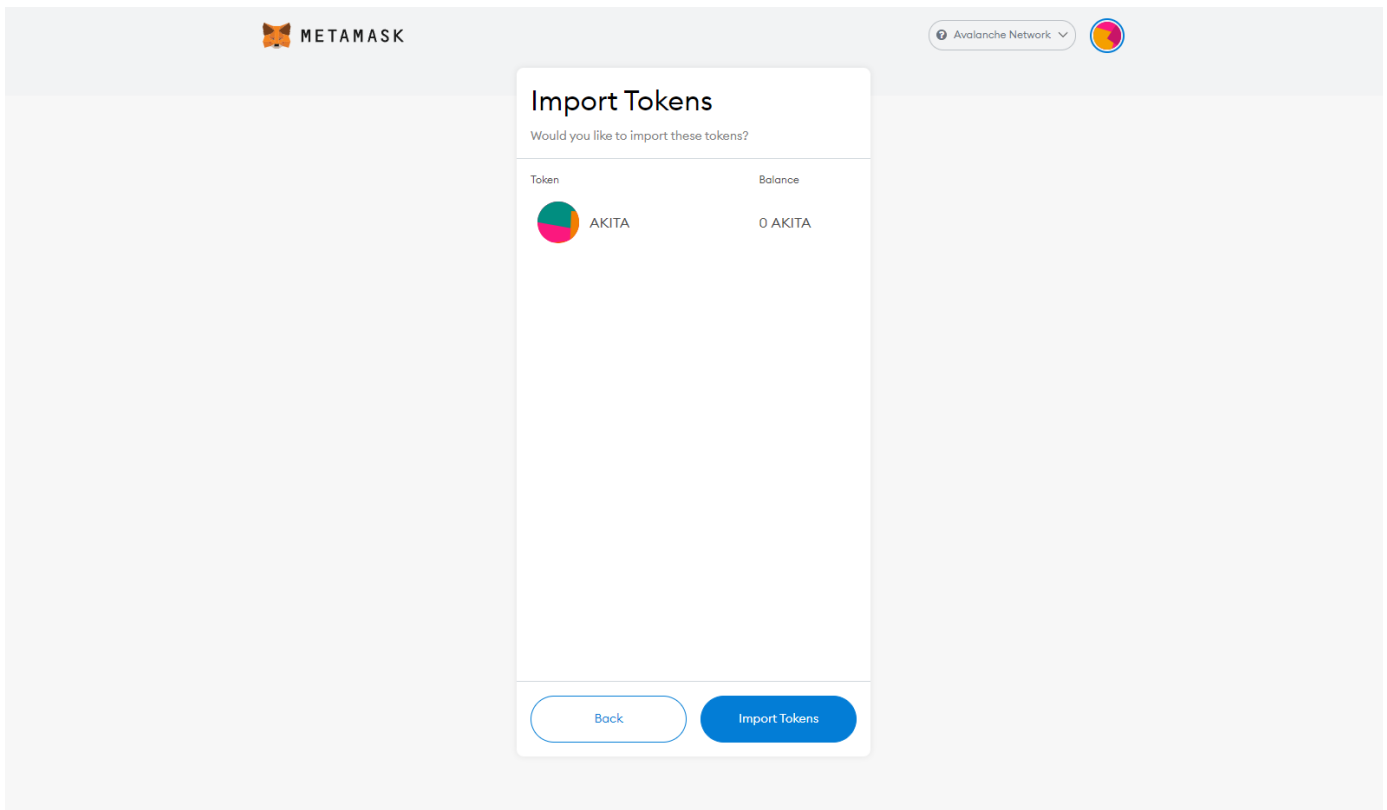

2. Select and click "Import tokens"

- Input AKITA AVALANCHE address as: 0xcaF5191fc480F43e4DF80106c7695ECA56E48B18
Click “Add Custom Token”.

- Click “Import Token”.

5. AKITA token is now imported into Avalanche Network of your Metamask wallet.
