

STEP-BY-STEP TUTORIAL FOR BRIDGING ETHER (ETH) TO AVALANCHE NETWORK WITH METAMASK WALLET

For this tutorial, Metamask wallet and **ETH** is used. Other wallets like Coinbase can also be used. The bridging is best performed on a computer browser with Metamask extension. Brave browser is recommended and can be downloaded and installed [here](#).

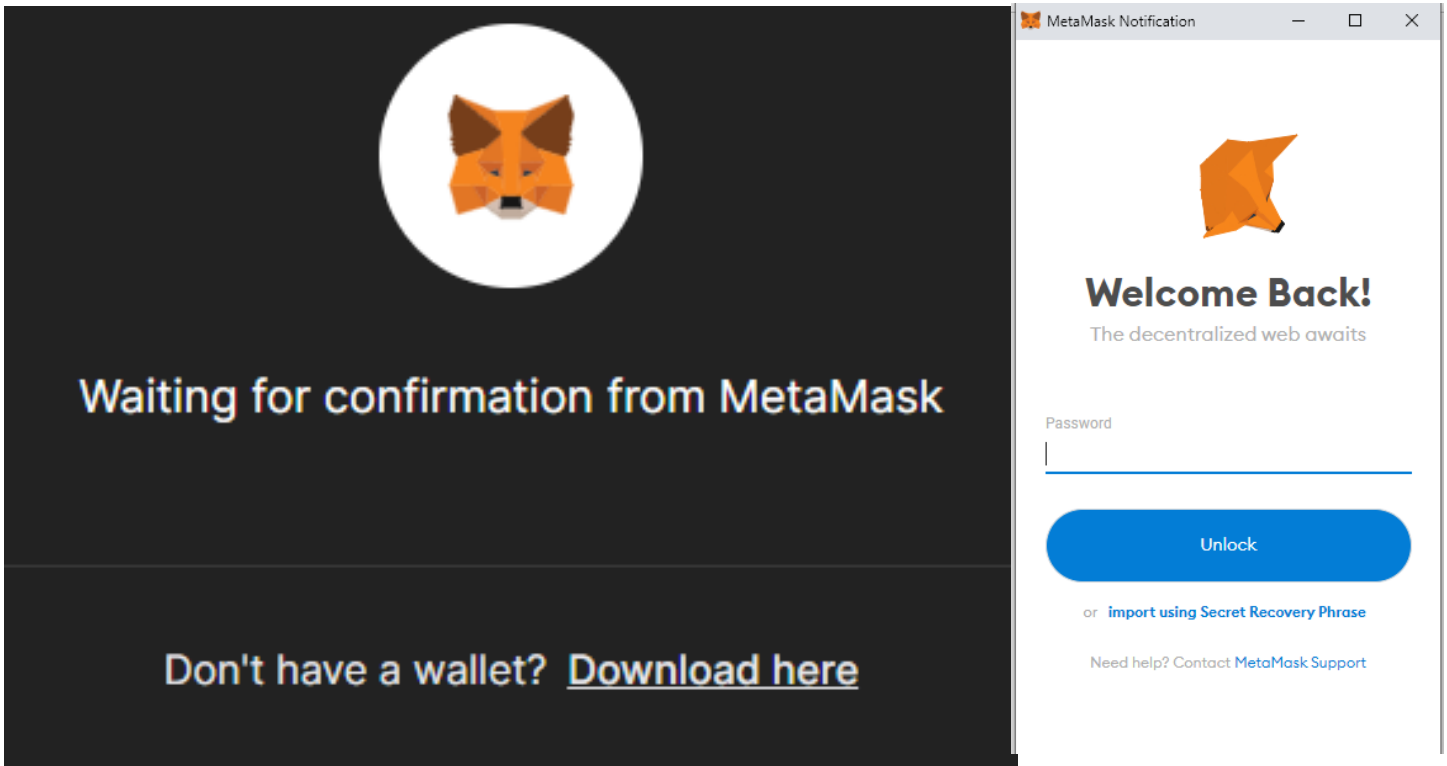

1. You need to have Avalanche Network setup in your Metamask Wallet. If you have not, go [here](#).
2. You will also need some ETH in Metamask for the bridging fee. \$10-\$25 worth of ETH is sufficient.
3. Switch your Metamask to Ethereum Mainnet.

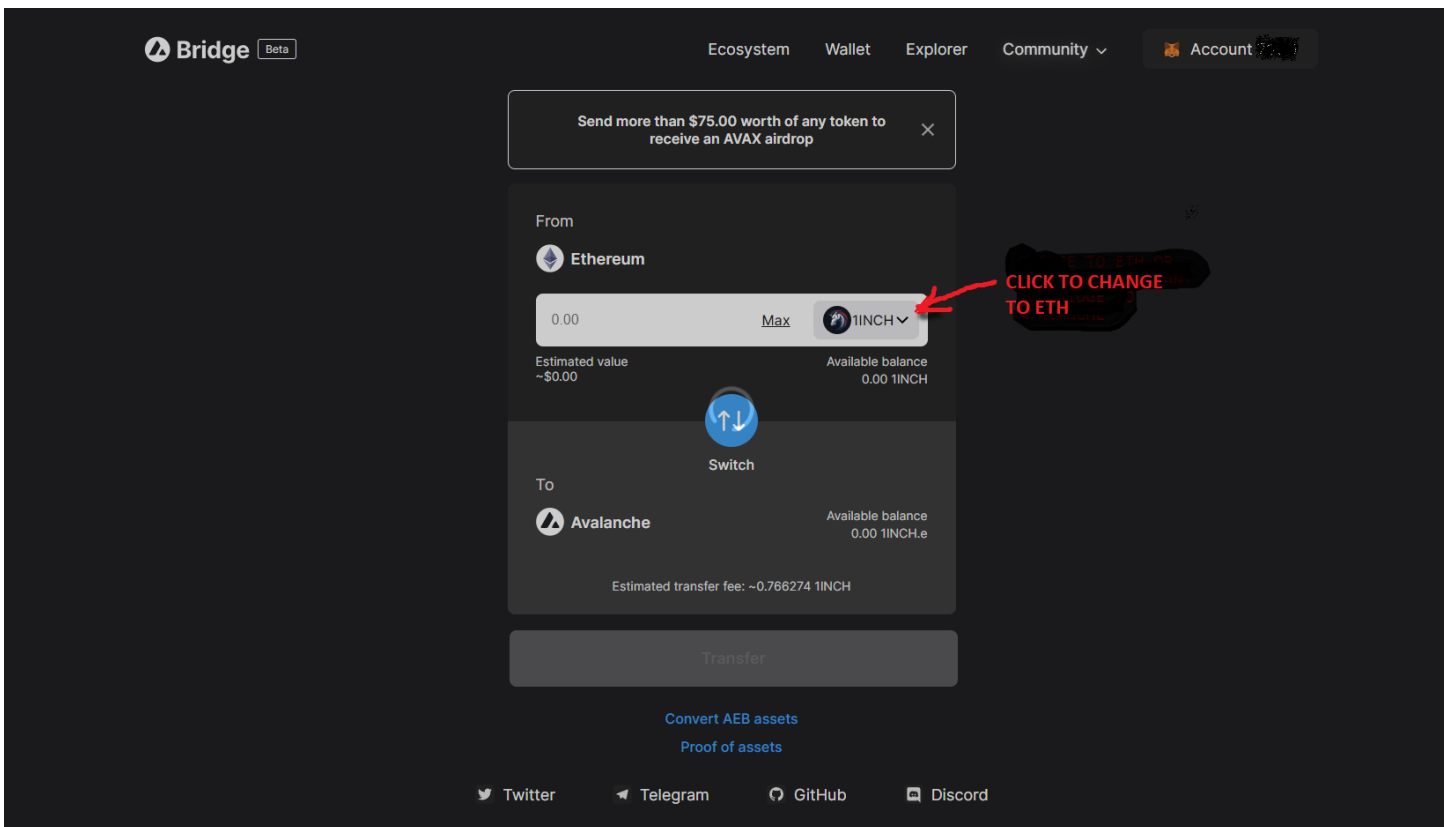

4. Go to: bridge.avax.network
5. Select Metamask to connect your wallet to the Avalanche bridge.

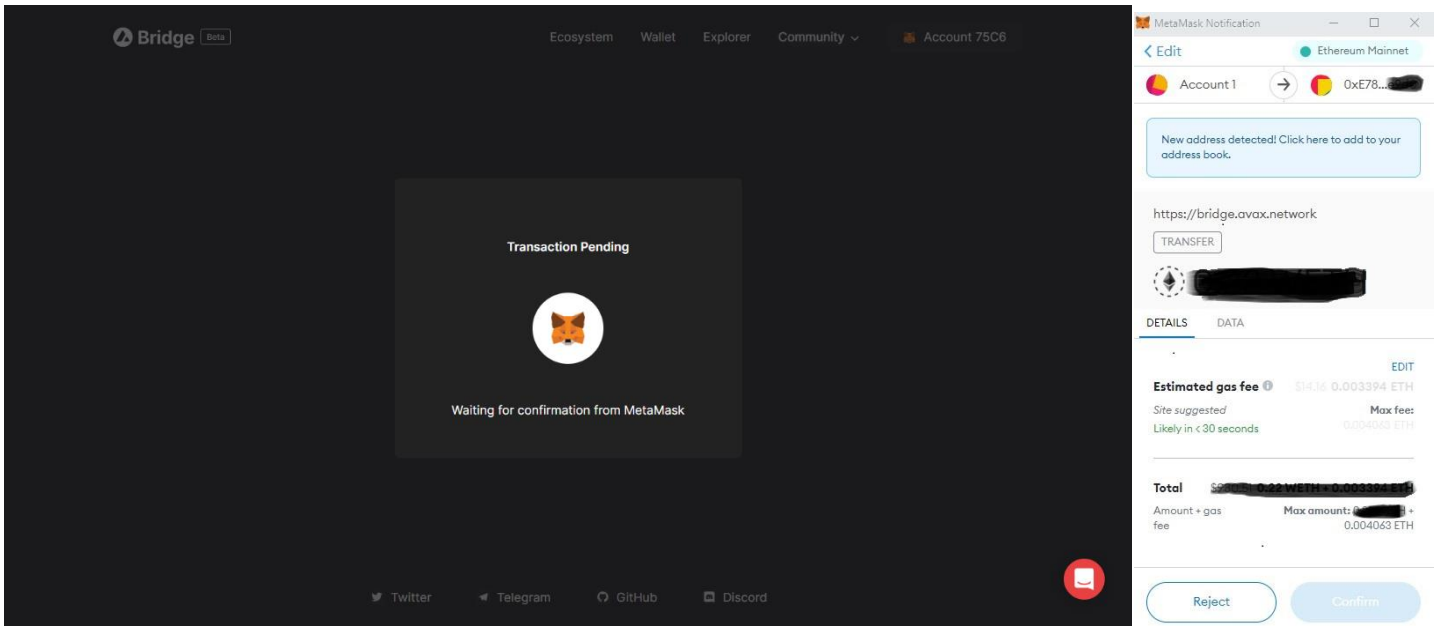

6. Enter your Metamask password.

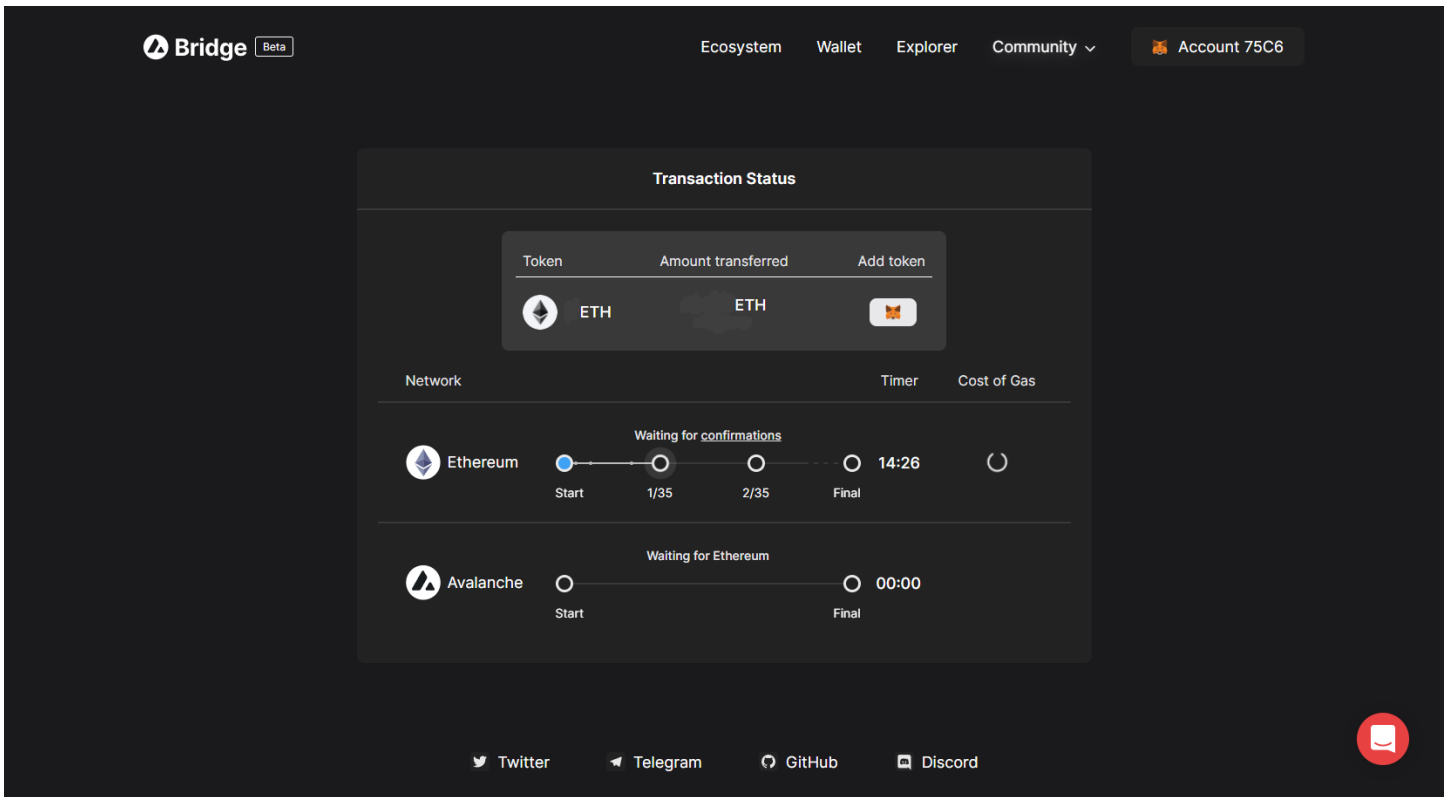

6. After connecting your Metamask wallet, click to change to ETH. Enter the amount of ETH that you want to bridge to Avalanche, then click TRANSFER.

7. Wait for the ETH gas fee to be acceptable before you click CONFIRM.

8. After you confirm the bridging, it can take from 10 minutes to 1 hour for 35 confirmation transactions to complete. Please be patient.

9. The bridge is now complete. And you are now ready to buy \$AKITA on Avalanche with cheap fees.

The screenshot shows the Avalanche ecosystem website interface. At the top, there is a navigation bar with 'Ecosystem' and links for 'Projects', 'Bridge', 'Wallet', 'Explorer', and 'Community'. A 'New to DeFi?' banner with a 'Video tutorial' button is visible. The main content area features a large white graphic with the Avalanche logo and the text 'AVALAUNCH Interoperable Token Pools and Auctions for Avalanche'. Below this is a 'Transaction Details' section comparing an Ethereum transaction (42 min, ~\$11.24 gas fee) with an Avalanche transaction (25 sec, ~\$3.01 transaction fee). A notification at the bottom states: 'You have received an AVAX airdrop! Discover what you can do on Avalanche! To ensure you have enough AVAX to cover transaction fees, use your airdrop amount to perform a swap to buy more AVAX. Don't see your assets in your MetaMask wallet? Make sure the token is added to your wallet.'

10. Please note that if you bridge more than \$75 of any token, you will receive a 0.05 AVAX airdrop to cover AVAX fees. Besides ETH, you can bridge USDT and some other tokens to Avalanche Network too.
